

Recruiter Screen: Review Potential Duplicates Task

When moving someone into recruiter screen you may receive a task >> Find Duplicates for Candidate. This task will only generate if a candidate has potential duplicate profiles. Best practice is to follow the below steps to review and merge if needed.

1. Click on Candidate Name/profile

- 2. From the candidate profile, navigate to the overview tab and then the Duplicates Tab.
  - a. From here at the bottom you will see the potential duplicates for your candidate (the context person seen at the top half of the screen).
  - b. You can click on view details for each profile to review the details to determine if it is in fact a duplicate.
    - i. If the details don't match up you would select remove as duplicate.
    - ii. If the details to match and it appears to be a duplicate, you would select the merge button.

**DO NOT ASSUME** and just merge all profiles. It could just be similar names. Example of a potential duplicate that is not truly a duplicate below  
**EX/** Example below of view details. You can assume this is NOT a duplicate because none of the details match up for the two profiles (phone, address, email). So for this one I would select **“Remove as Duplicate.”**
